There have been several accidents on 90 involving stacked up traffic leaving 90 to northbound 1604. The new traffic light just north of marbach road cause traffic backups to marbach road and that will get worse. The light at the 90 access road and 1604 causes traffic to back up to marbach and beyond in the morning. As a result I see people driving at high rates of speed on the shoulder in order to get on westbound 90.

We do not need to build a toll road to pay again to the road. Build it with road tax dollars or don't build it at all. We don't want a toll road in my area of San Antonio.

Not, Bandera...not Hyw 90, not IH 10 at the Dominion. Government allow all this development w/o providing infrastructure and now we residences are being asked to pay the price. Feels like discrimination to me.

These concerns are further elevated due to the proposed entrance and exits with respect to diverting traffic onto our city residential streets. This is further enhanced if these are tolled through ways.
